A Gift to Give.

It is often difficult to decide what to get your friends for holidays gifts. Here is a suggestion:

"Good morning, Jennie, I have brought you a nice present," said Gertrude, as she handed her friend a neatly wrapped package.

The pale, weary looking girl, who was slowly recovering from severe illness, opened the bundle and held up a large bottle of clear, rich medicine.

"Hood's Sarsaparilla!" she exclaimed. "I have been reading about it today and wished I had a bottle."

On New Year's Day Jennie was able to be out on the street, and to her friends who remarked how well she was looking she simply said, "Hood's Sarsaparilla," and every one of them knew it was this great medicine that had given back her health.

QUESTION OF EXTRADITION.

Washington, Dec. 31.—The War Department has referred to the Attorney General the application of Gov. Pingree of Michigan for the extradition of Charles J. Thompson, now in Cuba, who is wanted in Detroit to answer to the charge of forgery. There is no case analogous to this in the history of the War Department's control of Cuba. The officials of the War Department have no doubt that the Attorney General will sustain Gov. Pingree's demand. It probably will be held that if Gen. Wood can honor the demand of a foreign Government for the surrender of a fugitive he cannot resist a similar request from the Government of the United States.

ARMY SITUATION REVIEWED

Washington, Dec. 31.—Secretary of War Root had a long conference with President McKinley today at which they reviewed in detail the army situation. They were together over an hour and a half. So important was the conference that the President sent out word he could not be disturbed, and several Senators and Representatives who called grew tired waiting and left.

When Mr. Root departed he was very uncommunicative. Beyond saying the President and he had gone over the entire situation, not only in China and the Philippines, but in Cuba and Porto Rico, he declined to make any statement.

"PAN-AM." RESTAURANTS.

The Best of Service Will Be Provided.

The needs of the inner man will be well attended to at the Pan-American Exposition to be held at Buffalo from May 1 to Nov. 1, 1901. At some expositions a great mistake has been made by not providing for good restaurants, where satisfactory meals could be obtained at reasonable prices. Either the food obtained has not been of good quality or prices charged have been exorbitant or the facilities in some particulars have been inadequate to the occasion.

There will be good restaurants in different parts of the grounds of the Pan-American Exposition, so that it will not be necessary for visitors to go outside of the grounds to secure a good meal, well served, at a moderate price. All tastes will be suited in the services rendered, for there will be places where meals will be served on an elaborate plan to suit the most fastidious taste and where prices will be in proportion to those charged at high class restaurants in large cities. There will be other places where the meals will be cheap, but the food appetizing and healthful and the surroundings clean. There will be restaurants in the beautiful building at the entrance to the Midway, another in a similar building at the entrance to the Stadium, another in the Electric Tower, which will be one of the great centers of interest on the Exposition grounds, and another on the Midway. Refreshments will also be served in the Temple of Music, which may be enjoyed by visitors at the same time that they are listening to the concerts in progress in the auditorium. There will also be a New England kitchen, a German restaurant, a Mexican restaurant, an Italian restaurant and other places where various kinds of refreshments will be served.

The Government's Building.

The Government buildings at the Pan-American Exposition at Buffalo are being built by Rasmussen & Strehlow of Omaha. The contract calls for a group of three buildings connected by curved arcades. The main structure is to be 400 by 130 feet, with a dome 250 feet high, and the smaller buildings each 150 feet square. All departments of the government will make up to date exhibits, which the members of the Government board are now busy collecting and getting into shape.

Sea Currents and Migrations.

The French scientific journal *La Nature* calls attention to a recent report of the French consul at Hawaii which, it thinks, throws light on some problems of ethnography. Not long ago a little schooner, dismantled and with its rudder gone as the result of a tempest, was drifted by winds and ocean currents from Tahiti to Hawaii, after 81 days of helpless wandering. Hawaiian traditions declare that in ancient days people came from Tahiti, drifting with the currents, and settled Hawaii. The adventure of the dismantled schooner seems to prove the possibility of such a migration, and it is suggested that the currents of the Pacific, which have not yet been sufficiently studied, may throw much light on the distribution of the native races among the island groups.

How the Fuss Started.

"That 'hand-me-down suit' you're wearing," remarked Rivers, "reminds me of an unripe watermelon."

"Why?" asked Brooks.

"Because it's so different. One isn't cut to fit, and the other isn't fit to cut."

It was then that Brooks plucked away at him.—Boston Herald.
